Lyric Alignment on Plainchant Manuscripts

Tim de Reuse

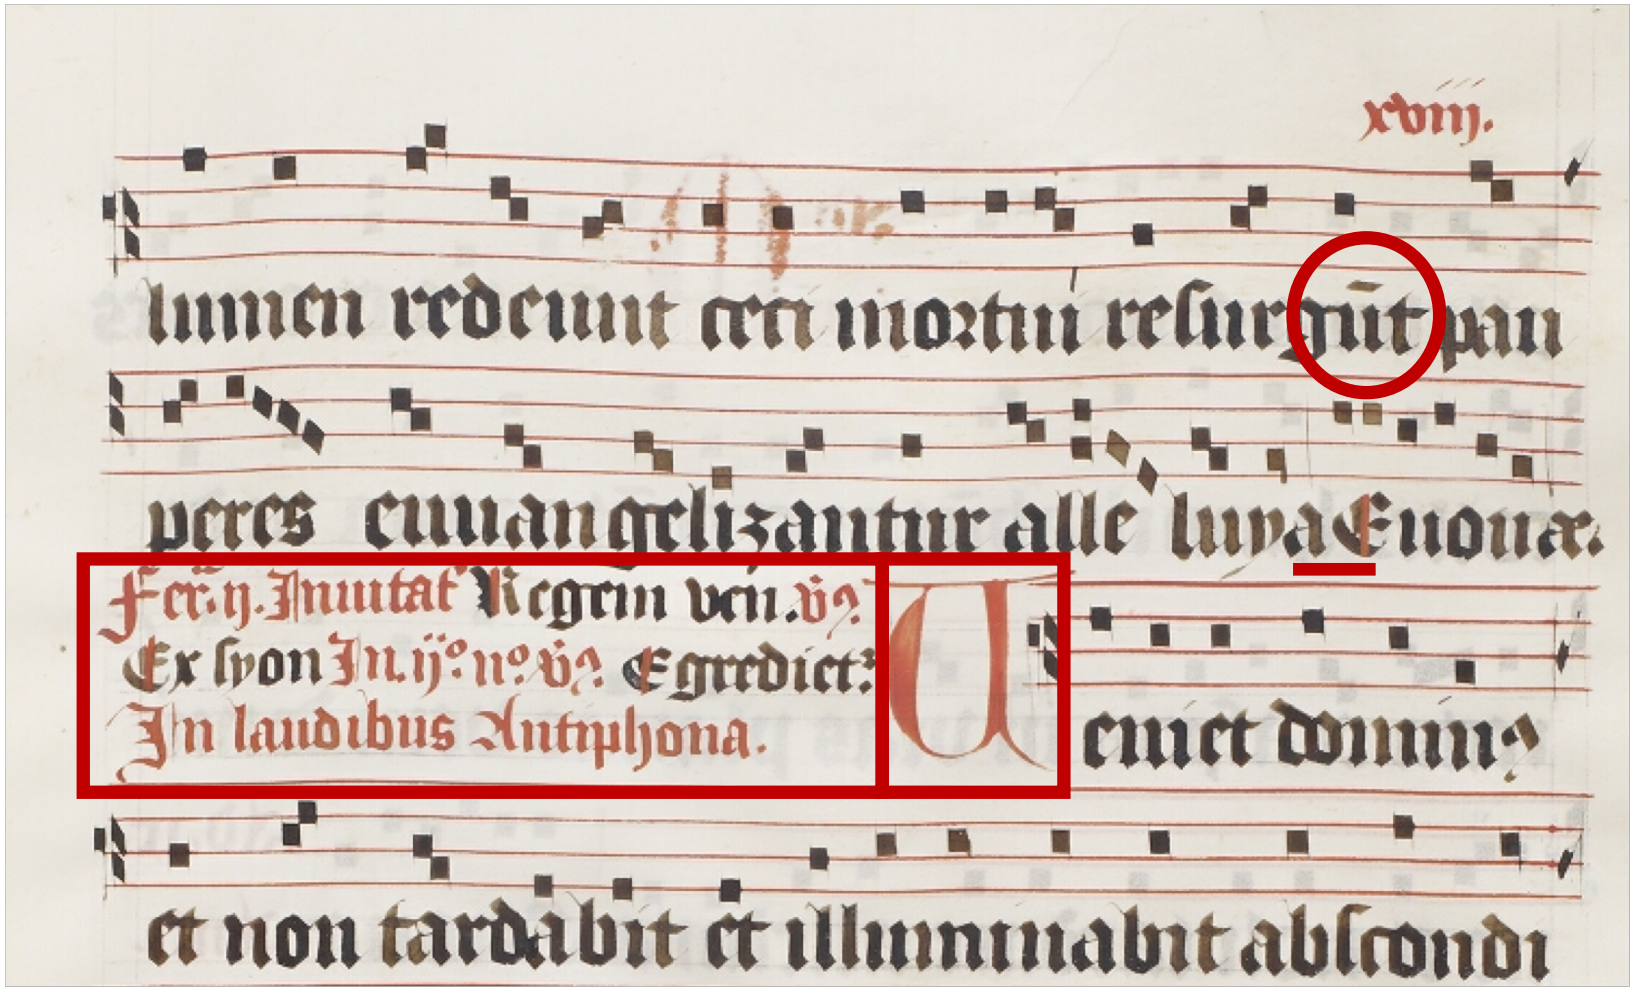
SIMSSA Workshop XVII

1/12/2018

Associating Neumes to Syllables of Text

- Must locate text first
- Optical Character Recognition (OCR) on handwritten sources is difficult!
- Existing transcripts do not indicate *where* text is on page

Non-musical Text



Abbreviations

Inconsistent Spacing

Ornamental Letters

TRANSCRIPT: lumen redeunt ceci mortui resurgunt pauperes euvangelizantur alleluya Euouae Veniet dominus et non tardabit et illuminabit abscondi (…)

Aligning to Imperfect OCR

- Run OCR on handwritten source
  - Find out where *most* of the characters are
  - Expect lots of errors
- Compare OCR result with correct transcript
  - Correct errors in the OCR and find all characters
  - Identify non-musical text, abbreviations, etc.

Training the OCR

- ~650 lines of text transcribed for training a model
  - 42 Pages of the Salzinnes Antiphonal
  - That's not a lot for handwritten OCR!
  - Using OCRopus open-source OCR system
- ~80% per-character error rate after 24 hours training
  - Good enough!

TRANSCRIPT:
`lumen redeunt ceci mortui resurgunt pauperes euvangelizantur alleluya Euouae`

OCR:
`lmmen redeunt ceci mortiiui resurgūt pan yeres eyugelisantur alle luya Euonae`

Global Sequence Alignment

- Given two sequences, edit them to make them “match up”
  - Cost minimization: as few gaps as possible for as many matches as possible

```
Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor
incididunt ut labore et dolore magna aliqua.
```

```
Lorem ipsum dollllllor acsit amet, consectur di.s elit,, eiusmmd tempodsr
incididunt ut lb ore etmagna aliqua.
```

```
Lorem ipsum do_____lor __sit amet, consectetur adipiscing elit, sed do
Lorem ipsum dollllllor acsit amet, consec__tur _di_.s____ elit,______,

eiusmod tempo___r incididunt ut labore et dolore magna aliqua
eiusmmd tempodsr  incididunt ut lb ore et________magna aliqua
```

Aligning the Transcript to OCR Output

TRANSCRIPT:
lumen redeunt ceci mortui resurgunt pauperes euvangelizantur alleluya Euouae

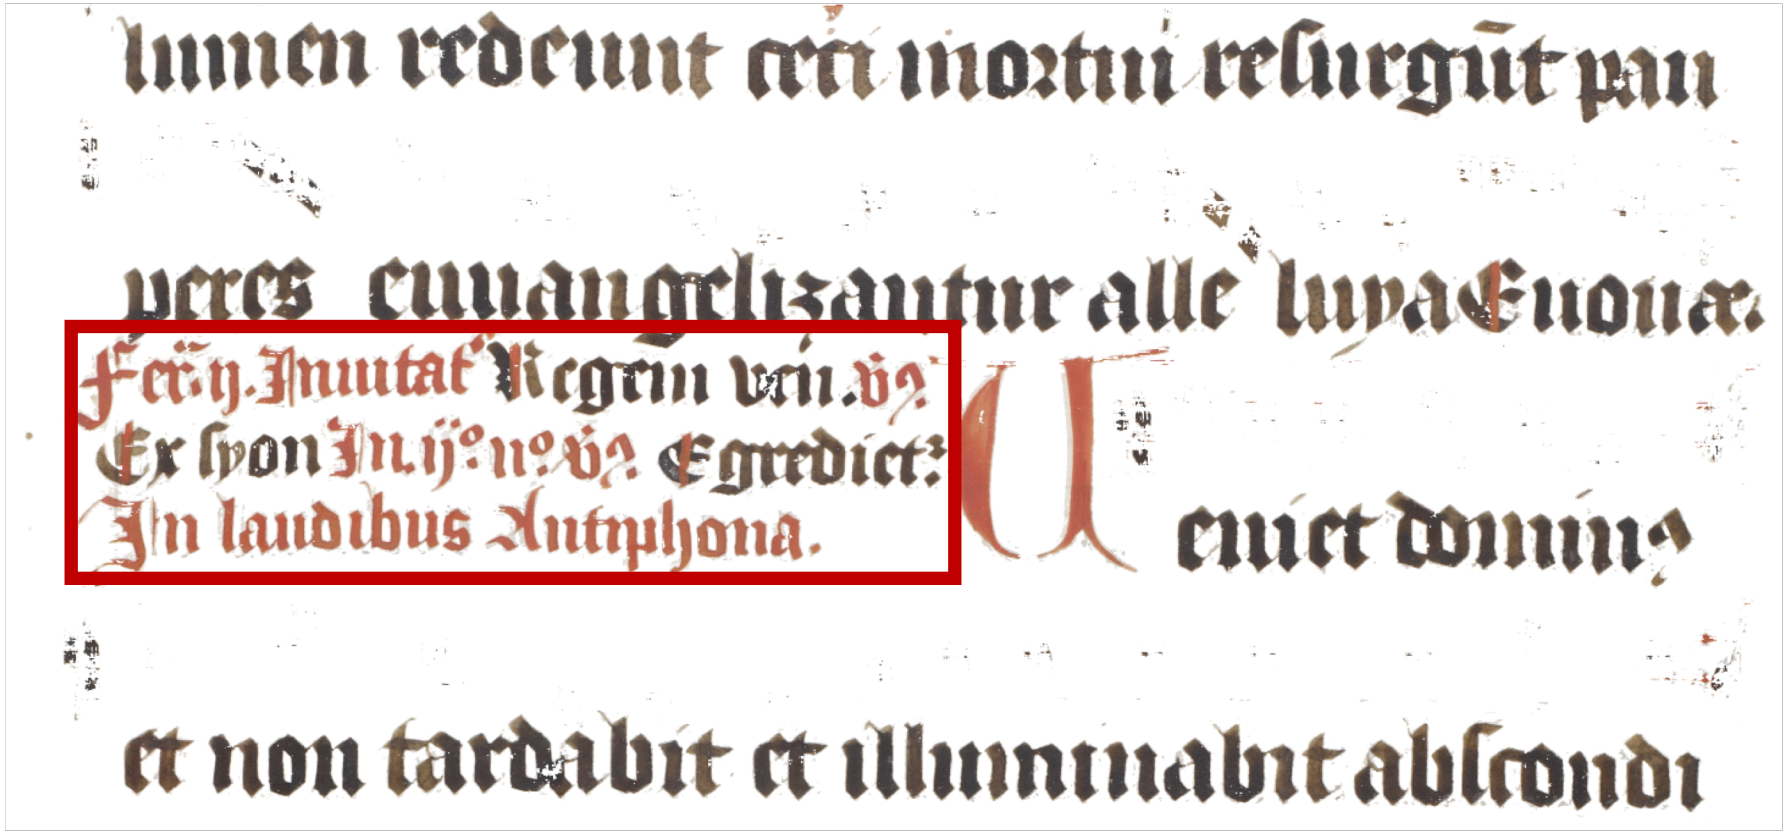
OCR:
lmmen redeunt ceci mortiiui resurgūt pan yeres eyugelisantur alle luya Euonae

ALIGNMENT:

```
lumen redeunt ceci mort__ui resurgunt pauperes
lmmen redeunt ceci mortiiui resurgu_t panyeres

euvangelizantur alle_luya Euouae
e__yugelisantur alle luya Euonae.
```

The OCR gets characters wrong, but the incorrect character is often aligned to the correct one in the transcript



lumen redeunt ceci mort__ui resurgunt pauperes euvangelizantur alle_luya Euouae_____
lmmen redeunt ceci mortiiui resurgu_t panyeres e__yugelisantur alle luya Euonae. cx.n nni

_____ Ven_____iet dominus et non tar
tat segeim ven.vus. In landibus Antiplhona In laud ibus Antiphona emet dominus_et non tar

A long gap: The OCR found non-musical text not present in the transcript, and the sequence alignment identified it as such
