

Dataset Creation and Automatic Harmonic Analysis of Joseph Haydn's Op.20

Néstor Nápoles López

CIRMMT Workshop on Digital Musicology

April 27th, 2018

McGill University

Introduction

- Work in the context of the CompMusic Project, at Universitat Pompeu Fabra
 - <http://compmusic.upf.edu/>
- Coordinated by Dr. Xavier Serra
- Supervision of harmonic analysis by Rafael Caro Repetto

Harmonic Analysis

Harmony

The simultaneous sounding of notes

Menuetto: Allegretto

The image shows a musical score for a Minuet in G major, Op. 20 No. 3 by Joseph Haydn. The title "Menuetto: Allegretto" is centered at the top. The score is written for four instruments: Violin I, Violin II, Viola, and Violoncello. The key signature is one flat (F major/D minor) and the time signature is 3/4. The score is divided into two systems of four measures each. A red rectangular box highlights the first measure of the second system (measures 5-6). Below this box, the word "Harmony" is written in red. The first measure of the second system contains a whole note chord in all four parts: Violin I has a G4, Violin II has a G4, Viola has a G3, and Violoncello has a G2. The second measure of the second system contains a whole note chord: Violin I has an A4, Violin II has an A4, Viola has an A3, and Violoncello has an A2. The third measure of the second system contains a whole note chord: Violin I has a B4, Violin II has a B4, Viola has a B3, and Violoncello has a B2. The fourth measure of the second system contains a whole note chord: Violin I has a C5, Violin II has a C5, Viola has a C4, and Violoncello has a C3. The first measure of the first system (measures 1-4) contains a whole note chord: Violin I has a G4, Violin II has a G4, Viola has a G3, and Violoncello has a G2. The second measure of the first system contains a whole note chord: Violin I has an A4, Violin II has an A4, Viola has an A3, and Violoncello has an A2. The third measure of the first system contains a whole note chord: Violin I has a B4, Violin II has a B4, Viola has a B3, and Violoncello has a B2. The fourth measure of the first system contains a whole note chord: Violin I has a C5, Violin II has a C5, Viola has a C4, and Violoncello has a C3.

Harmonic Analysis

Harmonic Analysis

The interpretation of harmonic structures in music, their resolution into relatively simpler constituent elements (e.g., chord labels), and the investigation of the relevant functions between those elements

Menuetto: Allegretto

The image displays a musical score for a Minuet in 3/4 time, marked 'Allegretto'. The score is written for four instruments: Violin I, Violin II, Viola, and Violoncello. The key signature is one flat (B-flat). The score is divided into measures by vertical bar lines. Red rectangular boxes are drawn across the staves, highlighting specific harmonic structures. These boxes are placed over measures 2 through 9, indicating a sequence of harmonic changes or structures. The Violoncello part features a prominent melodic line with a long slur spanning measures 6 and 7. The Viola part also has a long slur spanning measures 6 and 7. The Violin I and Violin II parts have more active, rhythmic lines.

Harmonic Analysis

Which simpler elements?

- Chord labels
- Figured bass
- Roman numerals (functional harmonic analysis)

Harmonic Analysis

Which simpler elements?

- Chord labels
- Figured bass
- Roman numerals (functional harmonic analysis)

Creating the Dataset

Creating the Dataset

About the six string quartets, Op.20

Joseph Haydn wrote 68 string quartets in total

Chronologically, Op.20 corresponds to numbers 23-28

They were composed when Haydn was 40 years old

As a reference, Beethoven and Mozart composed 16 and 23 string quartets, respectively

Number	Movement	Tempo
Op.20 No.1		
1	I	Allegro Moderato
2	II	Minuetto. Allegretto
3	III	Affettuoso e sostenuto
4	IV	Finale. Presto
Op.20 No.2		
5	I	Moderato
6	II	Adagio
7	III	Minuetto. Allegretto
8	IV	Fuga a 4 Soggetti
Op.20 No.3		
9	I	Allegro con Spirito
10	II	Minuetto. Allegretto
11	III	Poco Adagio
12	IV	Finale. Allegro Molto
Op.20 No.4		
13	I	Allegro di Molto
14	II	Un poco Adagio Affettuoso
15	III	Allegretto alla zingarese
16	IV	Presto scherzando
Op.20 No.5		
17	I	Allegro moderato
18	II	Minuetto
19	III	Adagio
20	IV	Finale: Fuga a due Soggetti
Op.20 No.6		
21	I	Allegro di Molto e Scherzando
22	II	Adagio, Cantabile
23	III	Minuetto. Allegretto
24	IV	Fuga a 3 Soggetti. Allegro

Creating the Dataset

- Find/Encode the 24 scores into a symbolic music representation
- Annotate the harmonic analysis of all of them using a consistent and “parsable” nomenclature
- Present the output of a known automatic harmonic analysis algorithm using the same nomenclature as the manual annotations
- Compare the automatic annotations to our dataset of manual annotations

Creating the Dataset

- Find/Encode the 24 scores into a symbolic music representation

Creating the Dataset

KernScores

<http://kern.ccarh.org/>

A library of virtual musical scores in the Humdrum ****kern** data format

Already contains **19 out of 24** scores from Op.20 in Humdrum (****kern**) format

Missing movement
Op.20 No.1 - III. Affettuoso e sostenuto
Op.20 No.2 - II. Adagio
Op.20 No.3 - I. Allegro con Spirito
Op.20 No.4 - I. Allegro di Molto
Op.20 No.4 - II. Un poco Adagio Affettuoso

Creating the Dataset

Humdrum

A syntax that is not necessarily related to music

One popular representation that complies with the Humdrum syntax is the ****kern** syntax, and it is used to store relevant information of a **musical score**

Creating the Dataset

- Find/Encode the 24 scores into a symbolic music representation
 - **Encode the 5 remaining scores in Humdrum (**kern) format**

Creating the Dataset

Manual encoding in Humdrum for the following movements:

Op.20 No.1 - III. Affettuoso e sostenuto
Op.20 No.2 - II. Adagio
Op.20 No.3 - I. Allegro con Spirito
Op.20 No.4 - I. Allegro di Molto
Op.20 No.4 - II. Un poco Adagio Affettuoso

The 5 movements encoded total an amount of **868 measures** of music

Using as a reference the version edited by Wilhelm Altmann, which can be found in the Petrucci Music Library (<http://imslp.org>)

Creating the Dataset

- Find/Encode the 24 scores into a symbolic music representation
- Annotate the harmonic analysis of all of them using a consistent and “parsable”
nomenclature

Creating the Dataset

****harm**

Another representation that complies with the Humdrum syntax, and allows to encode relevant information about **functional harmony**

Creating the Dataset

Annotating the harmony of Op.20

- Analyzing on paper
 - Néstor Nápoles López, Master student
 - Rafael Caro Repetto, PhD student
- Encoding using ****harm** syntax
- **4961** roman numeral labels

Creating the Dataset

- Find/Encode the 24 scores into a symbolic music representation
- Annotate the harmonic analysis of all of them using a consistent and “parsable”
nomenclature
- Present the output of a known automatic harmonic analysis algorithm using the
same nomenclature as the manual annotations

Temperley and Sleator (2001)

Creating the Dataset

- Find/Encode the 24 scores into a symbolic music representation
- Annotate the harmonic analysis of all of them using a consistent and “parsable” nomenclature
- Present the output of a known automatic harmonic analysis algorithm using the same nomenclature as the manual annotations
- Compare the automatic annotations to our dataset of manual annotations

Problems of Comparing Harmonic Analyses

1. Functional harmonic analysis involves not only the roman numeral labels, but the key changes and their exact location

Problems of Comparing Harmonic Analyses

Example:

Development section of the sonata form with trivial chords but ambiguous key

Problems of Comparing Harmonic Analyses

1. Functional harmonic analysis involves not only the roman numeral labels, but the key changes and their exact location
2. **harm syntax provides an infinite possibility of roman numeral labels, and comparing them is not trivial

Problems of Comparing Harmonic Analyses

Example:

III+c/i[V+b]

Re-spelling an augmented dominant as an augmented third degree in the minor mode

Problems of Comparing Harmonic Analyses

1. Functional harmonic analysis involves not only the roman numeral labels, but the key changes and their exact location
2. **harm syntax provides an infinite amount of labels, and comparing them is not trivial
3. No baseline evaluation of functional harmonic analysis

Comparison (plan B)

Resolution of harmonic roots

C major: I == G major: IV

C major: V/V == G major: V

C major: V7/vi == D minor: V7/v

Towards a Better Comparison

- Having an easier way to work with `**harm` syntax labels

- <https://github.com/napulen/harmparser>

Unfortunately, it was developed during the end of this research project and it was not used for the evaluation presented here
