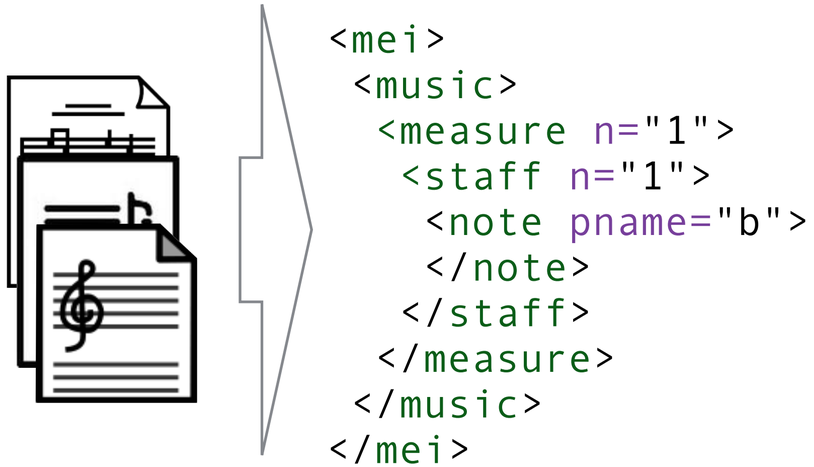
Optical music recognition (OMR) workflow



```
<mei>
 <music>
  <measure n="1">
   <staff n="1">
    <note pname="b">
    </note>
   </staff>
  </measure>
 </music>
</mei>
```

Optical music recognition (OMR) workflow

Document segmentation

Music symbol recognition

Musical notation recognition

Final representation construction

```
<mei>
 <music>
  <measure n="1">
   <staff n="1">
    <note pname="b">
    </note>
   </staff>
  </measure>
 </music>
</mei>
```

Optical music recognition (OMR) workflow

Document segmentation

Music symbol recognition

Musical notation recognition

Final representation construction

```
<mei>
 <music>
  <measure n="1">
   <staff n="1">
    <note pname="b">
    </note>
   </staff>
  </measure>
 </music>
</mei>
```

Optical music recognition (OMR) workflow

Document segmentation

- Binarization
- Enhancement
- De-skewing
- Morphological operations
- …
- Reference lengths
- Image segmentation

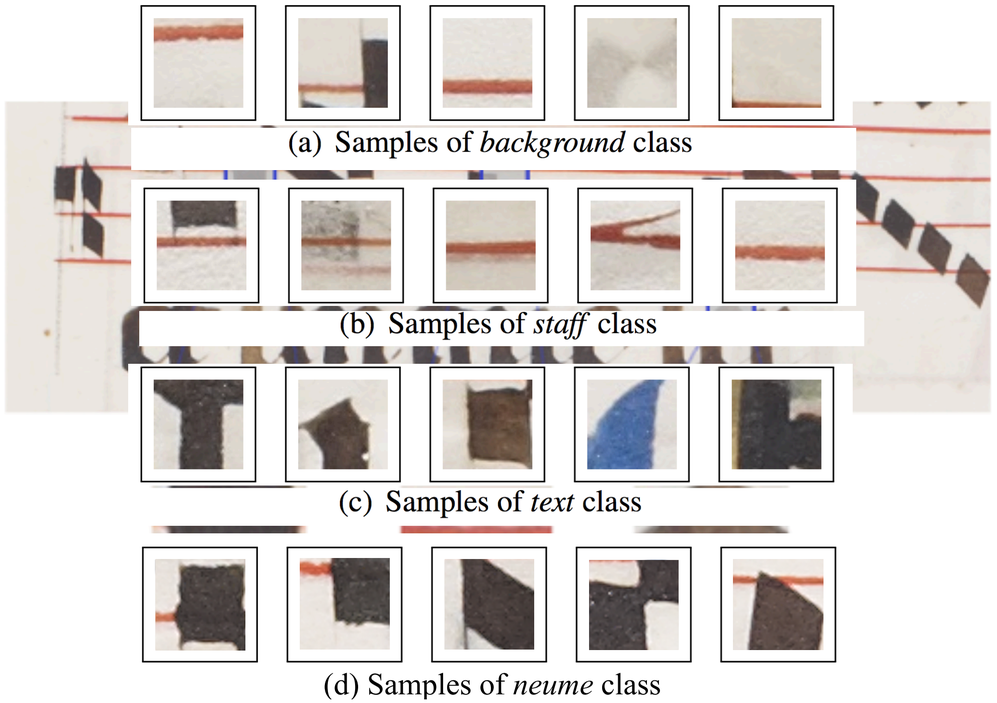
Optical music recognition (OMR) workflow

Document segmentation approach based on a convolutional neural network classifier (Calvo-Zaragoza, Vigliensoni, Fujinaga 2017)

Document segmentation

Classification Method

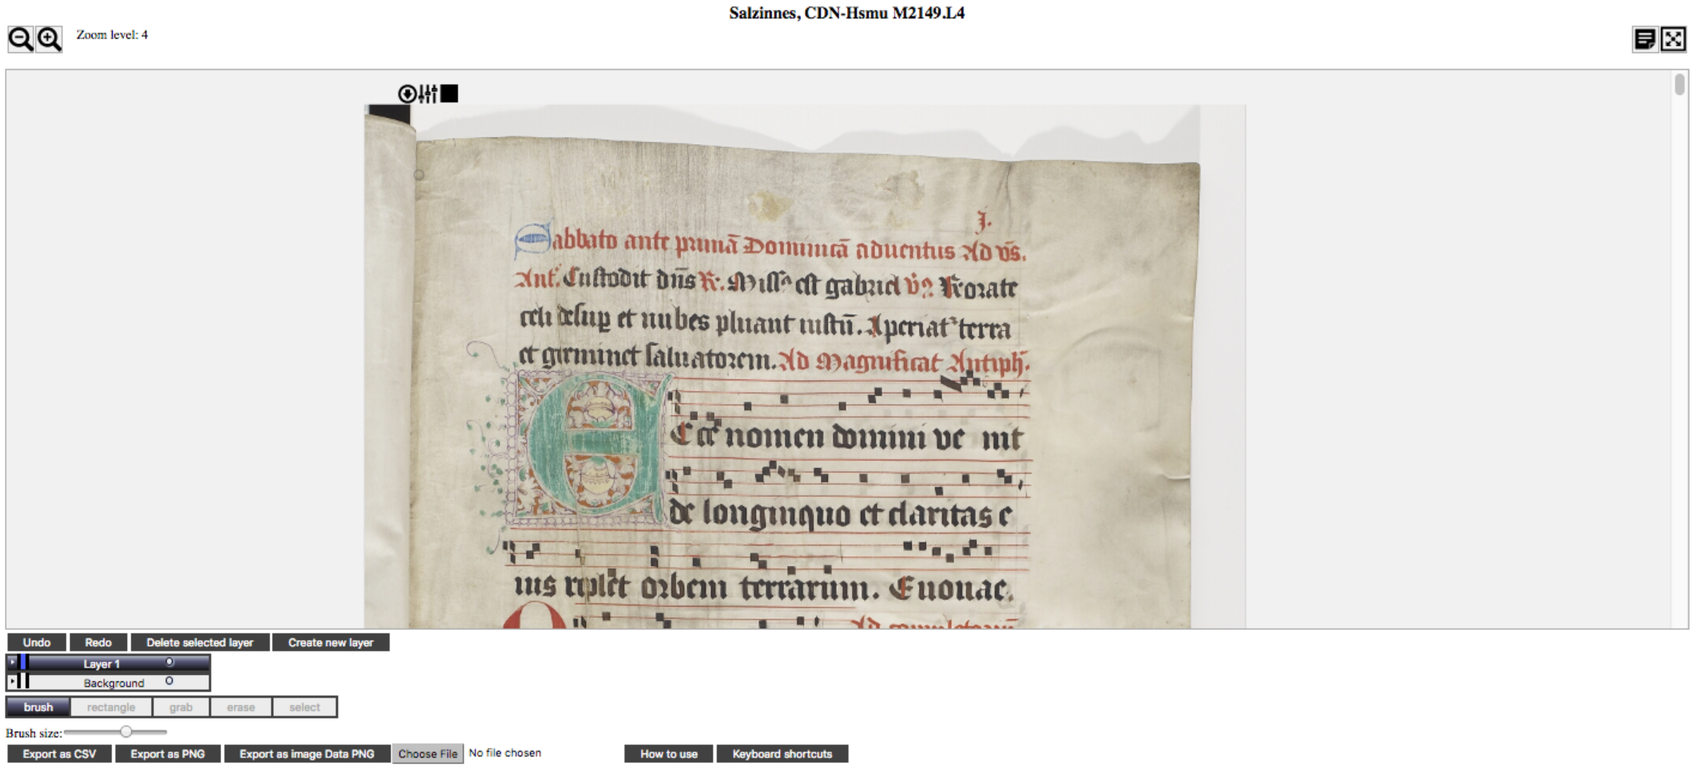
Pixel.js



Pixel.js

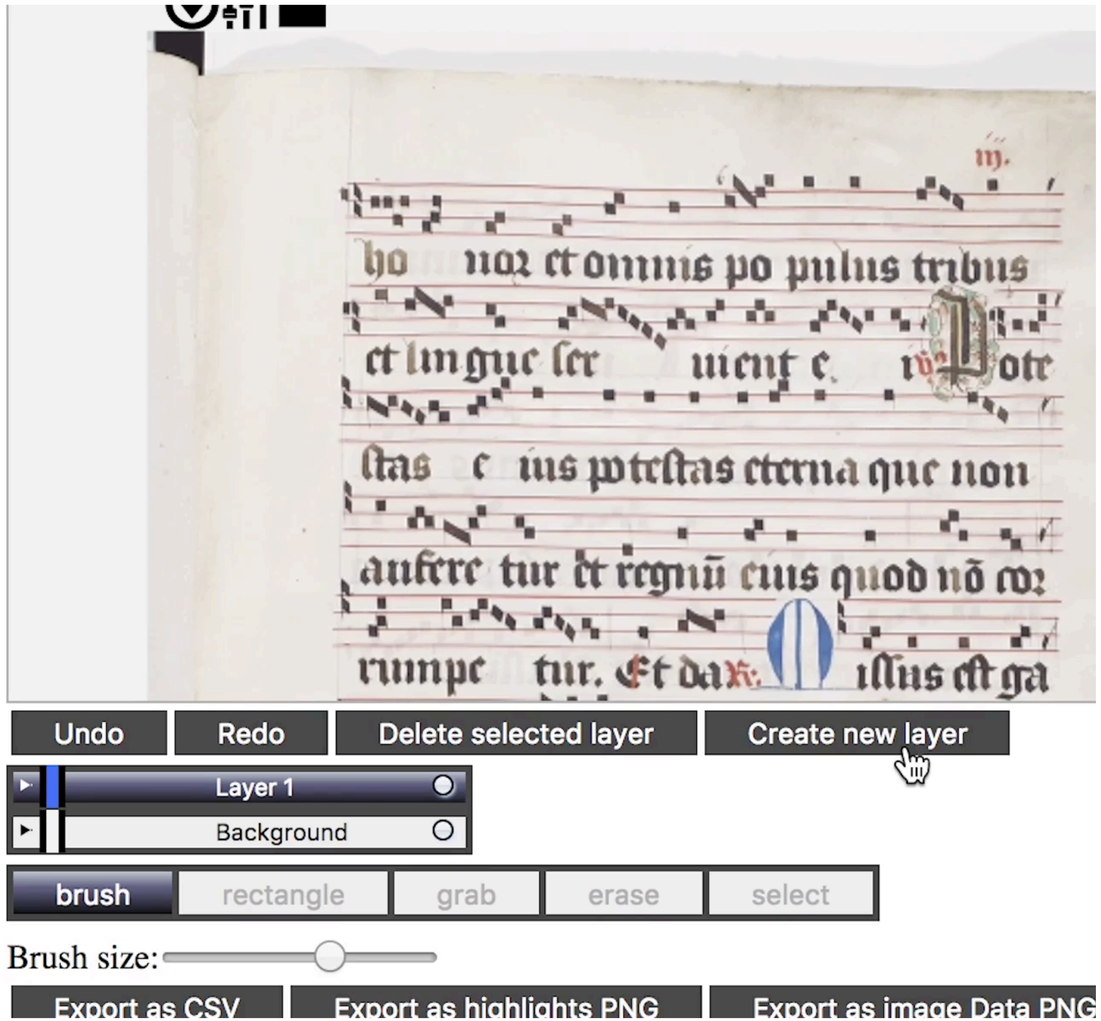
"Web-based pixel classification platform for ground truth creation"
(Saleh et al. 2017)

Built as a plugin for Diva.js, a web-based document viewer for high-resolution images
(Hankinson et al. 2012)



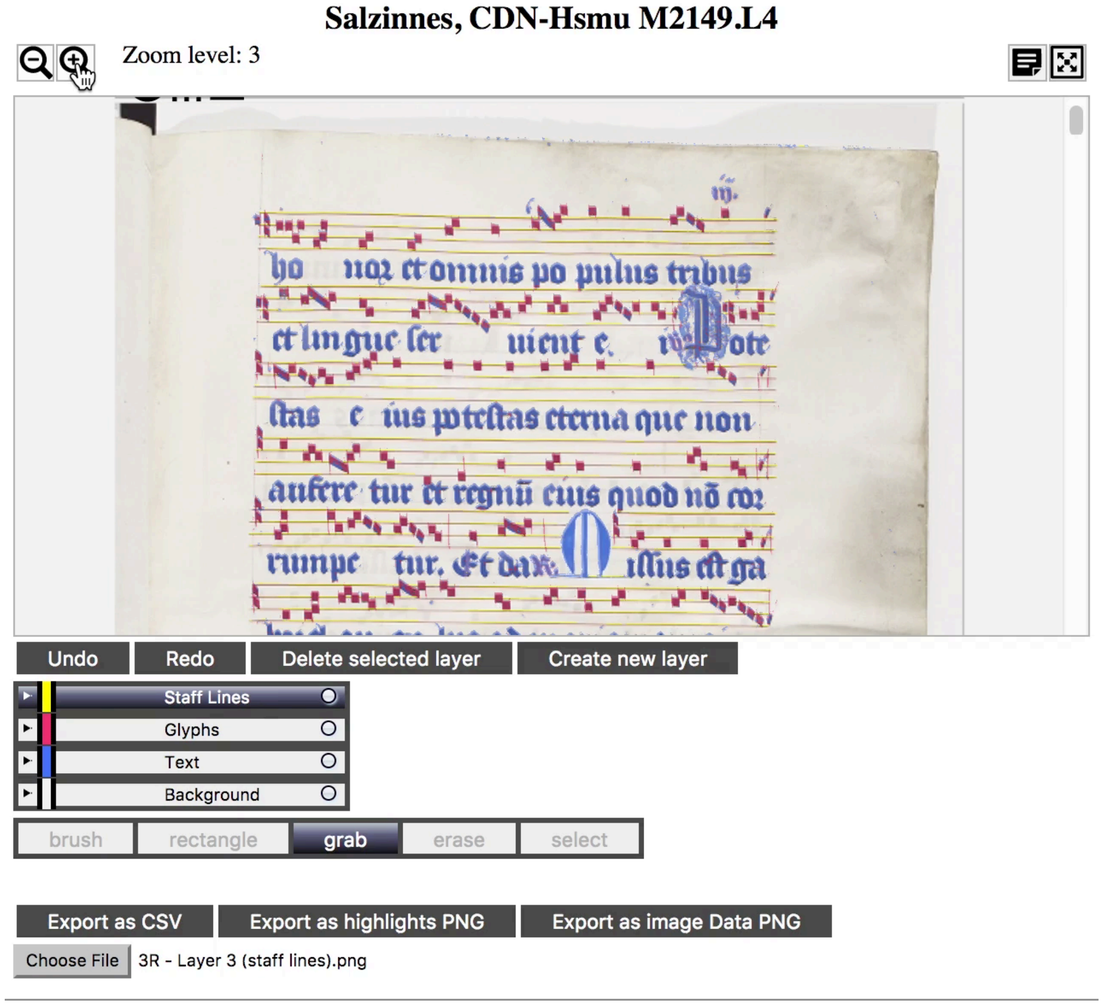
Pixel.js features
Colour-coded layers

Layer names can be changed!
For example:
“Staff lines”, “Glyphs”, “Text”

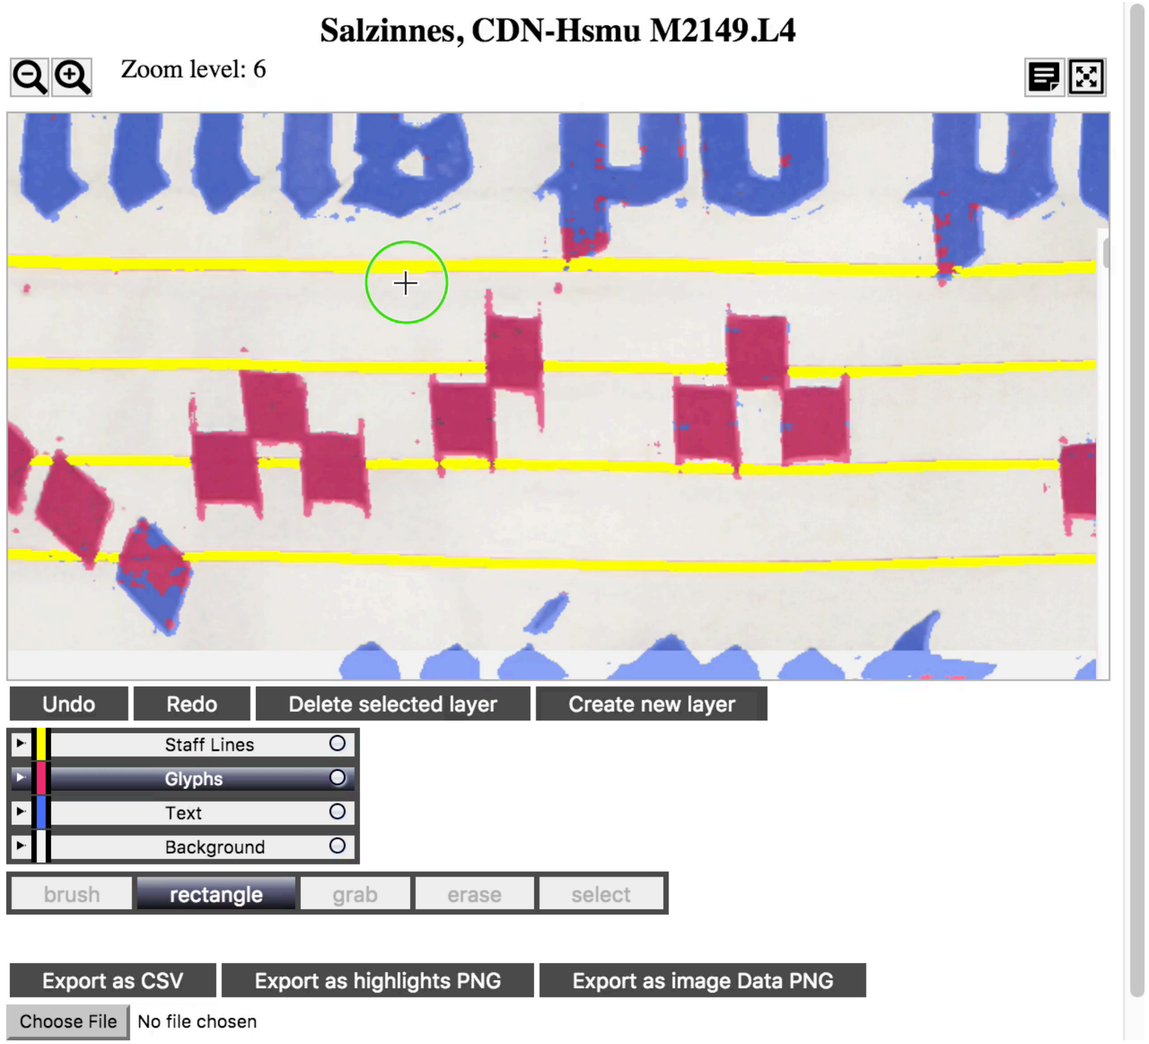


Pixel.js features
Zooming and navigation tools

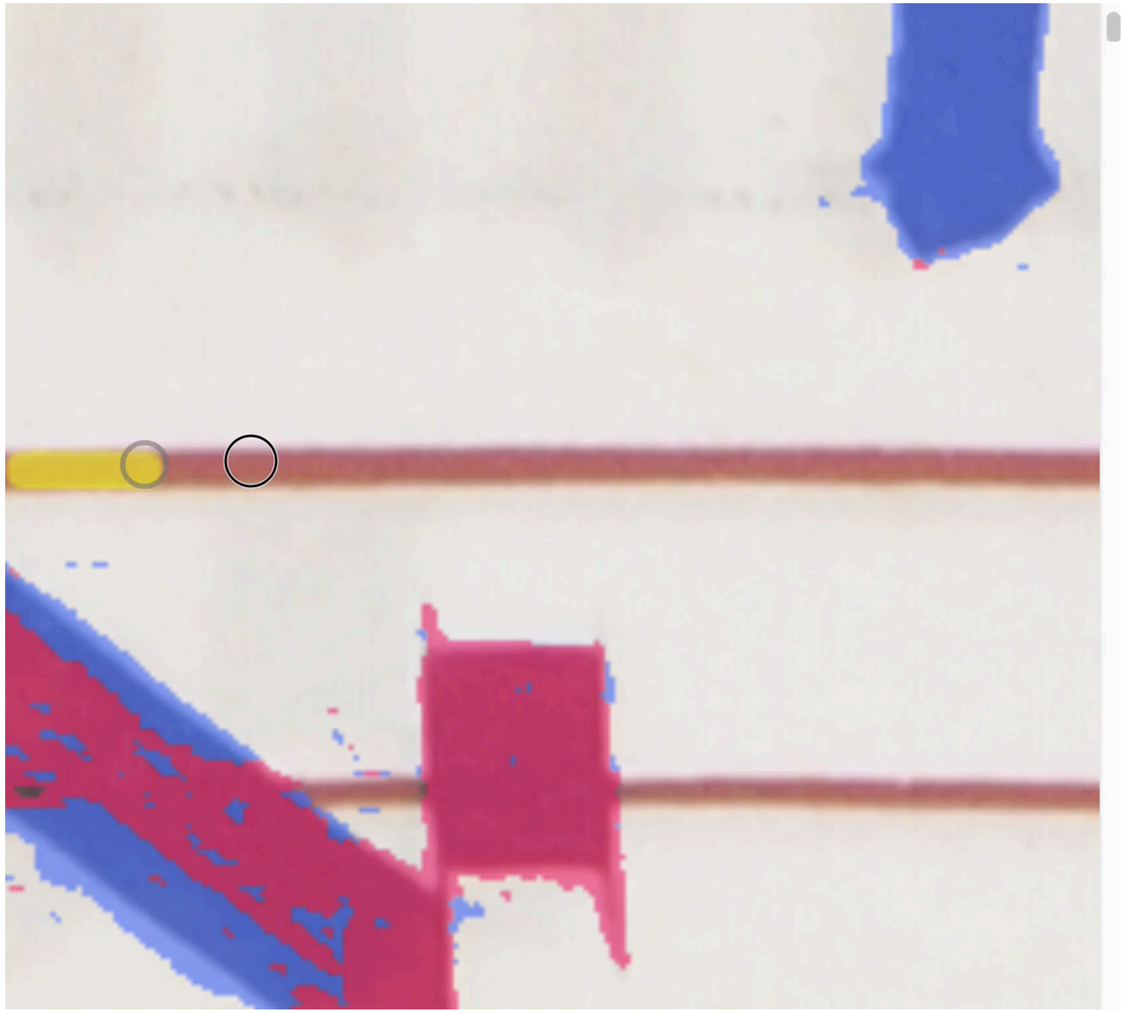
Zooming and navigation thanks to Diva!



Pixel.js
Brush and rectangle labeling



Pixel.js
Brush smart snapping

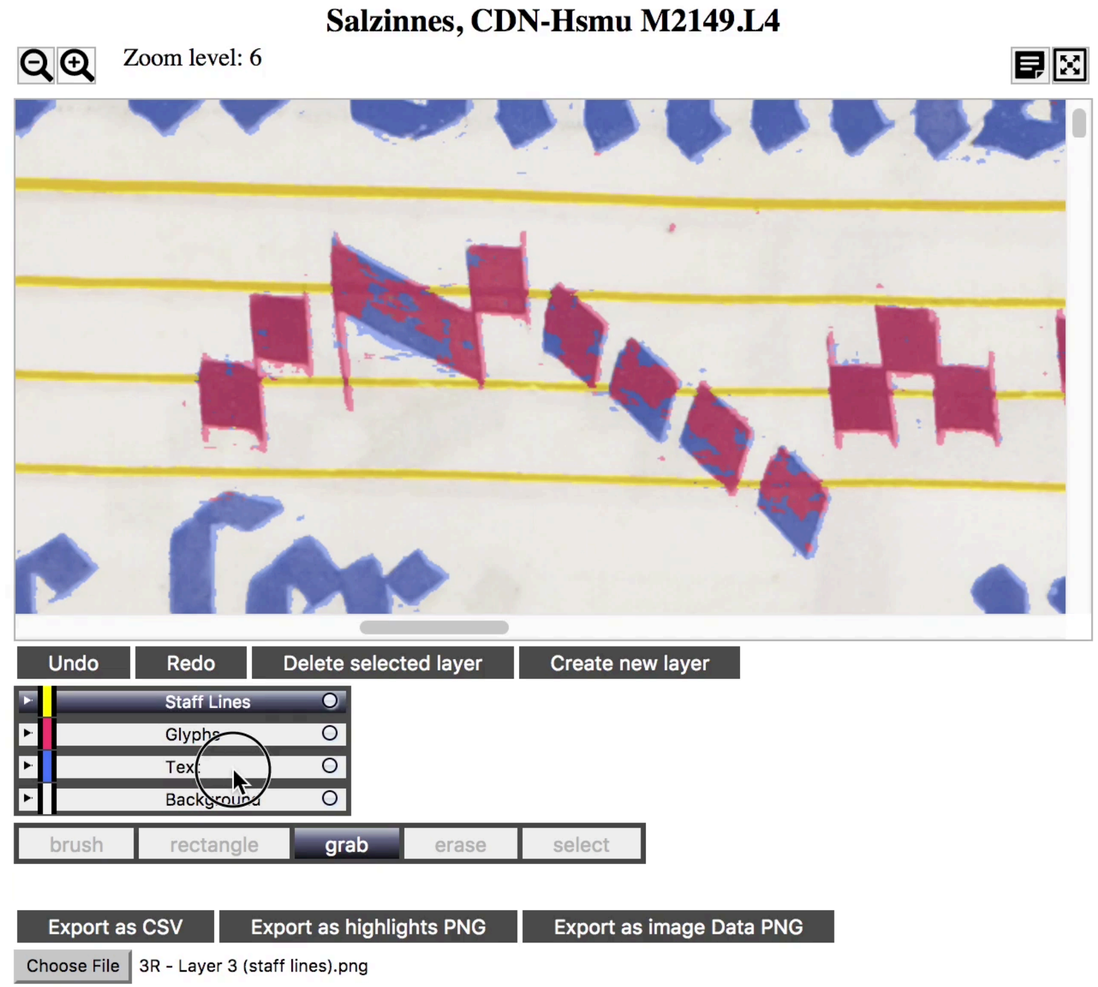


Pixel.js features
Adjustable layer opacity

Facilitates visualization, better usability!

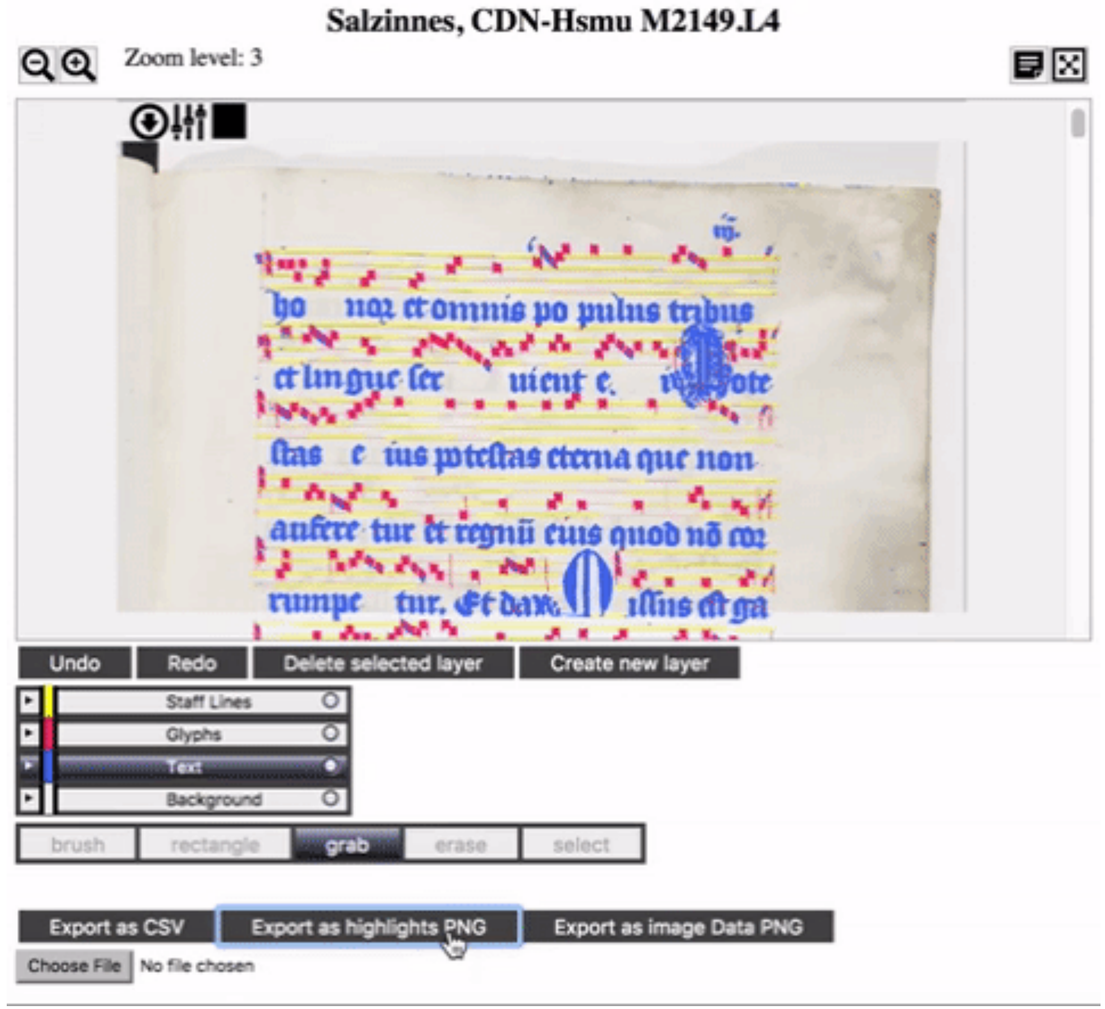
Pixel.js features
Layer editing tools

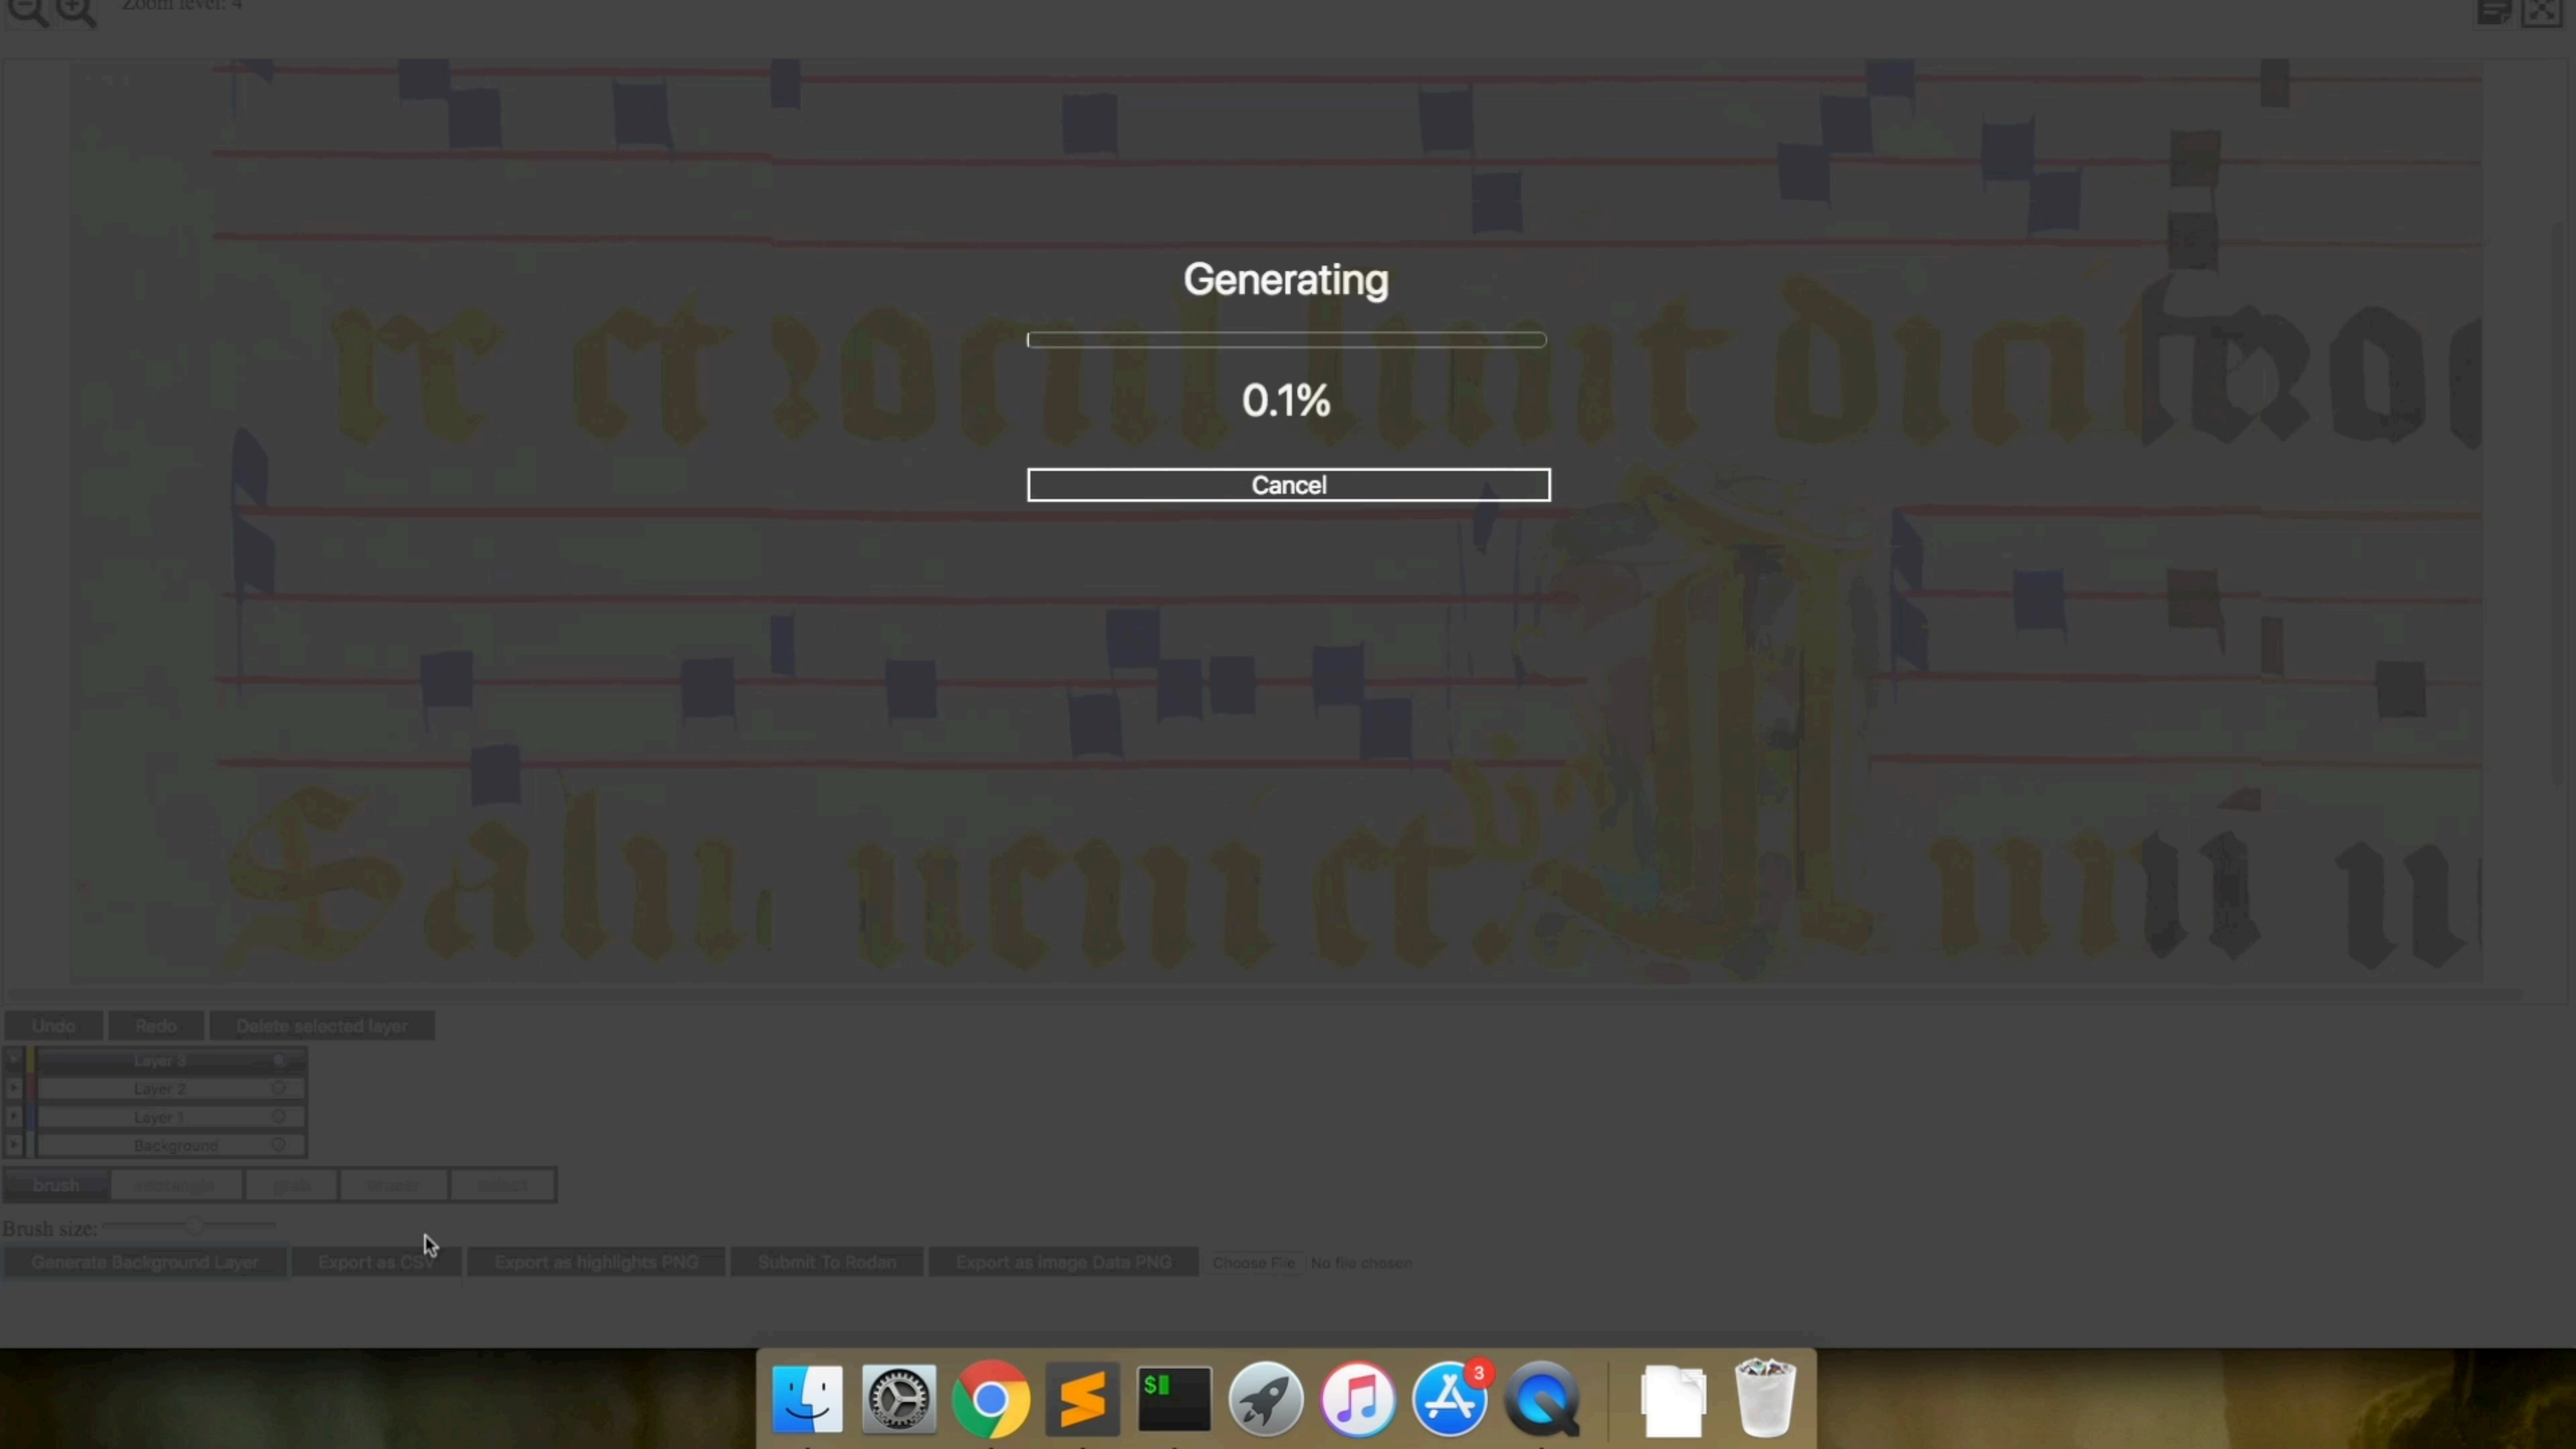
Quickly move regions of pixels from a layer to another!



Pixel.js
Export/import functionality

Can re-import to continue work!





Generating
